

# FLO<sub>2</sub>MAX Filtered Oxygen Mask

from Solutions in Critical Care

## Closed Mask Breathing System with 99.99% Filtration Efficiency

The FLO<sub>2</sub>MAX Filtered Oxygen Mask is an all-in-one closed mask breathing system that offers low, medium and high oxygen concentration and nebulization from just one mask. All patient exhalation is filtered through a submicron, hydrophobic 3M™ filter that maintains respiratory isolation during oxygen and drug aerosol therapy to help protect healthcare workers and patients from airborne infections. The FLO<sub>2</sub>MAX is a cost-effective, high-quality solution to oxygen therapy.

### Highlights

- Deliver 30% - 99% Oxygen
- Compatible with standard nebulizer for drug therapy
- Over 99.99% efficiency (BFE/VFE)
- Three mask sizes to ensure best fit possible
- 100% Latex-Free

Soft plastic and flexible aluminum nose piece help ensure airtight fit

Latex free closed system mask is made of soft durometer plastic and comes in three sizes to ensure comfort and fit

Intake valve allows patient to breathe from atmosphere only after oxygen reservoir is depleted

All patient exhalation passes through a 3M filter and out the exhalation valve

Ring shaped submicron, hydrophobic 3M filter provides over 99.99% BFE and VFE

Oxygen reservoir bag and inlet can be removed to accommodate a standard nebulizer

### How It Works

Item ID	Description
6100	Large Adult FLO <sub>2</sub> MAX Mask with O <sub>2</sub> Reservoir Tubing
6105	Small Adult FLO <sub>2</sub> MAX Mask with O <sub>2</sub> Reservoir and Tubing
6110	Child FLO <sub>2</sub> MAX Mask with O <sub>2</sub> Reservoir and Tubing
6250-N	Rescuer Nebulizer
